Woodstock, GA. 30189
USA

Company Overview

Pyrasoft, Inc. is a privately held and funded professional services firm focused on delivering robust enterprise solutions on the Microsoft and BMC Software's Action Request System platforms. Founded in 2001, Pyrasoft is a BMC Software Partner, Microsoft Gold Certified and one of the leading custom development and advanced infrastructure consulting firms in the southeast. The company is headquartered in Atlanta, GA and provides services to clients throughout the United States.

Pyrasoft' customers range from start-ups, to non-profit organizations, to Global 2000 companies and include such well known firms as AT&T, BellSouth, Intel, California ISO, MCI, EarthLink, and BJC HealthCare.

Leadership

Ibrahim A. Akar - President & CEO Pyrasoft, Inc.

Ibrahim Akar is co-founder and President/CEO of Pyrasoft. Mr. Akar is responsible for the sales and marketing operations of the company and works closely with company division leaders to craft the long-term strategy for the firm. After starting Pyrasoft in 1999, Mr. Akar led the effort to further fund the company and successfully raised angel financing as well as convertible debt. Mr. Akar has been integral in driving consistent double-digit annual revenue growth and Pyrasoft today is debt-free, cash positive, and continuing to establish itself as the premier Microsoft Gold Certified Partner in the southeast region.

Prior to starting Pyrasoft, Mr. Akar held senior Information Technology positions with IBM, MCI Telecommunications, and Wang Laboratories. Mr. Akar is a Remedy ARS certified consultant and has over 15 years of professional software engineering and consulting experience.

Ibrahim holds a Bachelor of Science degree in Computer Science from Kennesaw State University in Kennesaw, GA. In his time away from the office, Ibrahim enjoys time with his family, playing and coaching football, and watching European league football. Ibrahim and his wife Nisreen currently live in Atlanta, GA and have three young children.

- Exchange Server 2003 Design and Deployment
- SQL Server 2005 Deployment and Optimization
- Network Infrastructure Design including Switching, Routing, and Firewall Services
- Backup and Mass-Storage (SAN, NAS, DAS) Design and Deployment
- Battery Backup and UPS Solutions
- Data Room Design and Environmental Controls

I.T. Outsourcing

I.T. Outsourcing is becoming an increasingly prevalent and attractive option for many companies. Smaller firms are looking to outsourcing because they can't justify a fulltime technology resource or they need varying types of resources and would need to hire several fulltime individuals to satisfy those needs. Larger firms are looking at outsourcing as a means of acquiring expert-level talent and staffing consistency. By leveraging a focused external vendor for specific I.T. needs, these companies are able to avoid the headaches associated with recruiting, training, and retaining in-house personnel.

By outsourcing the I.T. function, companies are able to focus more attention on their core business and customers. Via outsourcing, I.T. can become a utility and the daily tasks and headaches often associated with that function are handled by a qualified vendor.

Pyrosoft and Logical Process offer I.T. Outsourcing and Management plans for all types of business within the small-to-mid market segment. The list below includes the outsourced I.T. services provided by our companies.

- Strategy and "Virtual CIO" Consultation with Company Management
- Information Technology Planning and Project Management
- I.T. Asset Management

- Systems Implementation and Ongoing Management
 - Network Monitoring and Alerting
 - Server and Workstation Patching and Upgrading
 - Network Health Checkups
 - Tape Backup Management
 - Security Management
 - Virus, Spy ware, and Spam Prevention
